Colin Sheldon

Berkeley, CA • (925) 266-1391 • colinshe@berkeley.edu • linkedin.com/in/colin-sheldon-5b768229a

EDUCATION

University of California, Berkeley Berkeley, CA
B.A. Statistics (change of major effective Spring 2027) • GPA: 3.6 2024 – 2028
Relevant Coursework: Data 100, Data 8, Math 54, Math 53

QUANTITATIVE PROJECTS

PJM Electricity Price Forecasting & Spike Analysis 2026
- Built an hourly day ahead price forecasting pipeline for PJM Western Hub using historical prices, calendar features, Ridge regression, and XGBoost.
- Cut mean absolute error 11.8% versus a previous day baseline across 8,760 hourly observations in 2025, using monthly expanding window evaluation to avoid lookahead.
- Tested performance on extreme prices and forecast uncertainty with a paired block bootstrap; found that lower average error did not consistently improve spike performance.

Kalshi Probability Calibration & Historical Holdout Evaluation 2026
- Built a Python pipeline with audited data sources to study calibration across 969 Kalshi observations spanning markets and horizons; tested bias using inference clustered by event and hypothesis tests with Holm adjustment.
- Evaluated logistic recalibration on 360 forecasts across six chronological holdout folds; found no clear score improvement at the one week horizon and tested sensitivity to fees, spreads, and event weighting.

EMCOR Group (NYSE: EME) Equity Research & Investment Thesis 2026
- Built a segment level earnings model forecasting FY2027 revenue of ~$22.8B and EPS of ~$40 versus ~$36.83 consensus; valued shares at ~$880 on a 22.0x forward P/E.
- Analyzed segment profitability, $17.1B in remaining performance obligations, electrification demand, and operating margin durability.

Project Helios Infrastructure & Real Assets LBO Model 2026
- Modeled PPA tariffs, capacity, OpEx, and EBITDA; built debt schedules based on CFADS (DSCR >1.4x), exit equity valuations, and sponsor IRR.

EXPERIENCE

Tesla San Francisco Bay Area, CA
Technical Program Management Intern *Fall 2026*
- Building AI skills to automate CapEx, design, and construction workflows, reducing manual coordination; adopted by 100+ users.
- Rebuilding search for Tesla's internal real asset tracking platform, improving retrieval accuracy across infrastructure and retail portfolio datasets; serving 50-100 concurrent users.
- Analyzing CapEx, expansion timeline, and site selection data with finance, design, and construction teams.

Swinerton Walnut Creek, CA
Project Engineering Intern, Healthcare *Summer 2026*
- Ran budgeting, scheduling, and fiscal risk tracking for $100M+ John Muir Hospital expansions and seismic upgrades; managed RFIs, submittals, change orders, and HCAI/OSHPD compliance.

ZoningOS Berkeley, CA
Founder *Winter 2025 – Spring 2026*
- Built and launched an ADU zoning research platform using retrieval augmented generation (RAG) and geospatial data in two weeks.
- Validated the market with architecture firms and home builders; signed 11 LOIs representing $7,000 in prospective MRR and onboarded 11 beta clients within two weeks.

AECOM Oakland, CA
Transit Rail Engineering Intern *Summer 2025*
- Led QA of 1,000+ BART Central Warehouse AutoCAD drawings; prepared civil and drainage sheets for ACE Turlock and Midtown rail projects.

AWARDS & CERTIFICATIONS

- **1st Place, ASC Regions 6 & 7 Sustainability Competition (2026):** led the Berkeley team in a 24 hour case against ~60 universities.
- **Wall Street Prep Financial & Valuation Modeling Certification (2026):** built three statement, DCF, LBO, M&A, and comps models from SEC filings.

SKILLS

Programming: Python (pandas, NumPy, SciPy, statsmodels, scikit-learn, XGBoost), SQL, MATLAB
Statistical Methods: Linear and logistic regression, regularization (Ridge, LASSO), gradient descent, cross-validation, feature engineering, PCA, time series forecasting, hypothesis testing, bootstrap methods
Finance & Tools: Excel (three statement, DCF, LBO, M&A, comps), Power BI
Languages: Spanish (Seal of Biliteracy), Brazilian Portuguese (limited working proficiency)
